DETAILED ACTION

1. Claims 1-19 are allowed.
2. The following is an examiner's statement of reasons for allowance: the art of record, when considered alone or in combination, does not anticipate nor render obvious the claimed method of drying a non-woven fabric. The most relevant art of record found is US Patent 6,322,732 to Bowen et al. Bowen et al. teaches a method for drying a web with suggested steps of varying the tension on the web from one zone to another. However, the suggested variation is to increase, as opposed to decrease, the tension in subsequent drying zones. Furthermore, the tension variation is performed to change the shape of the finished web. There is no suggestion to remove less than 98% of a solvent coating on the web in the first drying zone and then remove the remaining amount while the web is held at increased tension in a second drying zone.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Emery et al., Sarni et al., Hanaya, and Sando et al. teach similar web drying apparatus.
